

Assignment -4

Docker and Kubernetes

Assignment Date	21 October 2022
Student Name	VIGNESH K
Student Roll Number	710719205056
Maximum Marks	2 Marks

1.Pull an image from docker hub and run it in docker Playground

The screenshot shows a web browser with multiple tabs. The active tab is Docker Hub, displaying the repository page for `uifd/ui-for-docker`. The page indicates that the repository is deprecated and suggests using Portainer instead. Below the repository information, there is a section titled "UI For Docker" with a note that development continues at `portainer/portainer`. To the right, a "Docker Pull Command" box shows the command `docker pull uifd/ui-for-docker`.

Below the Docker Hub page, the Docker Playground interface is visible. It shows a session titled `cd9an2u3_cd9av060qau0008hbjs0` with an IP address of `192.168.0.13`. The interface includes buttons for "CLOSE SESSION", "OPEN PORT", "DELETE", and "EDITOR". A terminal window is open, displaying the following commands and output:

```
# This is a sandbox environment. Using personal credentials is HIGHLY discouraged. Any consequences of doing so are completely the user's responsibilities.
#
# The FWD team.
#####
[node1] (local) root@192.168.0.13 ~
$ docker pull uifd/ui-for-docker
Using default tag: latest
latest: Pulling from uifd/ui-for-docker
841194d080c8: Pull complete
